A B O U T M E

As someone that is starting to explore the world of web development, I'm very interested in learning and acquiring new experiences. My wish is to continue learning in a working environment where I could explore the Frontend and Backend aspect of Web development. I am an open minded, responsible, and innovative person, with an enquiring mind and an ability to remain good-humored and unflappable under pressure. I'm able to communicate well with people at all levels.

W O R K E X P I R I E N C E

2017-

Elementary School "Dragan Lukić" - Computer science teacher

As a teacher I am responsible to create an interesting and engaging curriculum for my students that span ages between 11 and 14. Daily duties are to communicate with students, share knowledge and engage their minds. I am quite lucky that Computer Science is a very popular class among the students so we tend to have fun and interesting classes. As teachers we tend to wear many hats, so beside my primary duties I was also responsible for maintaining the school's website and I was also involved with the marketing process of our school.

2016 - 2017

Associate Information Officer

I worked at College for European business and marketing as Associate Information Officer in the financial sector. My duties were to maintain a database of all students, to track their payments and debts and to facilitate a flow of information between all sectors.

2015 – 2016

ABC Tutors – online English tutor

At this time I was working as a part-time, online English tutor. Primarily I was teaching student from east Asia but sometimes from all over the world. They were people from all areas of life. The classes were conducted in virtual classrooms that could contain up to six students.
